* Partial or full dam closure occurred after this date and before the end of the year.

Note 1: For data of this type to be statistically valid, it requires a minimum study period of several decades during which time a consistent dam operating procedure is followed. Beginning in 2014 CY, the County honored the Asst. Prosecutor's interpretation of the Court Order that no dam gates shall be opened prior to Nov 1st to commence start of winter drawdown.

Note 2: The County is responsible for managing the dam such that the lake levels are maintained and adjusted in accordance with the Asst. Prosecutor's interpretation of the 1926 & 1982 Court Orders.

Note 3: Gauge Height Levels:

- LL = 5.37 Feet Legal (summer) Level per 1926 Court Order (1154.11 ft. above sea level). The Order does not define it as a "do not exceed" or "maximum" level.
- W6" = 4.87 Feet Lowest Legal Winter Level per 1982 Court Order, defined as not more than 6" (0.5 ft.) below Legal (summer) Level.
- T9" = 4.62 Feet Trial 5 year Winter Level per 2009 Court Order, defined as not more than 9" (0.75 ft.) below Legal (summer) Level; it expired April, 2014
